### FLIP7 GREENWATER FILTER

GREENWATER

### DOUBLE HANDLE TRAY

### JOBY GORILLAPOD TRIPOD

## GREENWATER WIDE & MACRO

Cold water diving isn't all about the small critters, large scenes abound too! If you hail from the colder climes, use our recommended configuration for green water wide angle and macro shooting for your GoPro camera and FLIP filters and accessories. In addition to our FLIP Filter System, we recommend the Flip Filters Double Handle & Tray mounted on top of the Joby Gorillapod, Flex Arms, and Sola 2500 Video Lights run in "spot" mode to help light up your macro footage and "wide" mode to light up your scene. Lighting in wide angle scenes dramatically assists the GoPro in acquiring better white balance in camera as well as increasing the contrast of your footage.
